SUMMARY

AI-focused Computer Science undergraduate with strong academics (KEAM Rank 3331, CBSE XII 95%, CBSE X 94%), national hackathon recognition (2nd Place – ICGAIFE 3.0), and hands-on experience building production-grade desktop applications, full-stack web platforms, blockchain analytics tools, and AI-driven screening systems.

EDUCATION

Muthoot Institute of Technology and Science (MITS)	Kochi, Kerala
<i>B.Tech in Computer Science and Engineering (Artificial Intelligence)</i>	2024 – 2028
Higher Secondary Education (CBSE XII)	Kerala, India
<i>Science Stream – 95%</i>	2024
Secondary Education (CBSE X)	Kerala, India
<i>General – 94%</i>	2022

PROJECTS

KeyBase – Key Management System <i>Java, Swing, H2 Database, ZXing</i>	v4.0 – Active
- Built and commercially sold a full-featured desktop application for key duplicator shops, now actively deployed in a business firm; manages customer records, key tracking, and webcam-captured photos with an embedded H2 database – zero server setup required. - Implemented multi-criteria search, date-range filtering, payment-mode (Cash/UPI) filtering, and CSV export for streamlined record management. - Developed a Sales Analytics Dashboard with interactive charts (daily, monthly, yearly) showing total sales, key-type distribution, and quantity metrics. - Engineered keyboard navigation (Ctrl+S/P/F/E shortcuts), context menus, print support with formatted reports, and a portable installer bundling a JRE for end users.	
ShareDash – High-Speed Multipath File Transfer Engine <i>Rust, Kotlin, Android, WinRT, Wi-Fi Direct, BLE</i>	Aug 2026
- Architected an open-source, zero-cloud multipath file transfer system bridging Windows and Android, concurrently aggregating physical USB cable (ADB/RNDIS) and Wi-Fi Direct into a unified pipeline achieving 100+ MB/s. - Developed an adaptive chunking engine (2 MB–64 MB) with dynamic work-stealing scheduling across heterogeneous channels and parallel in-flight streaming workers for maximum throughput. - Implemented multi-layer data integrity and security featuring CRC32 frame checksums, cryptographic SHA-256/BLAKE3 hashing, AES-256-GCM encryption, and concurrent direct-offset disk writes via FileChannel.	
Blockchain Transaction Graph Explorer <i>Next.js, Fastify, Neo4j, Three.js, JWT</i>	
- Architected a full-stack blockchain transaction monitoring and fraud detection platform with Neo4j graph database, Next.js App Router frontend, and Fastify REST API. - Implemented JWT-based authentication, CSV/JSON data ingestion, and suspicious-activity detection algorithms computing wallet-level risk scores. - Built an interactive Graph Explorer with 2D (Cytoscape.js) and 3D (Three.js) visualizations, shortest-path analysis, and live wallet tooltips; project forked by 3 GitHub users. - Designed a Wallet Inspector for risk profiling, fraud-pattern tagging, and cluster membership analysis across multi-hop transaction chains.	
Leadis – AI Developmental Screening Platform <i>Next.js, MediaPipe, Flask, ML</i>	2025
- Developed a web platform for early identification of learning disabilities in children through multimodal behavioral analysis – speech, gesture, and gamified assessments. - Integrated MediaPipe gesture recognition in-browser with a Flask ML backend for server-side inference and risk scoring. - Built schema-driven dynamic forms with ML-encoded field mapping for lead scoring and adaptive screening paths. - Won 2nd Place at the ICGAIFE 3.0 “AI Samasya” national hackathon (24-hour, 30 finalist teams, INR 30,000 prize).	

ACHIEVEMENTS

KeyBase – Commercial Sale & Live Business Deployment	2025
- Designed, developed, and commercially sold KeyBase v4.0 – a desktop key-shop management system – which is now actively deployed and running in a business firm, handling real customer records and daily operations. - Demonstrates end-to-end product ownership: requirements gathering, iterative development across 4 major versions, packaging with a portable JRE installer, and successful handoff to a paying client.	
National Level 2nd Prize – AI Samasya Hackathon (ICGAIFE 3.0)	Jan 2026
- Won 2nd Place among 30 finalist teams in a 24-hour national hackathon organized by the Dept. of Higher Education and IHRD, Government of Kerala; awarded INR 30,000. - Led Team “Beyond Vision” to build an AI-assisted multimodal developmental screening platform for children.	
Bharatiya Antariksh Hackathon 2025 (ISRO)	2025
Received Certificate of Acknowledgement from ISRO/Hack2Skill for successfully submitting an innovative idea addressing real-world space and technology challenges.	
KEAM Entrance Examination	2024
Secured State Rank 3331 in the Kerala Engineering Architecture Medical entrance examination.	

CERTIFICATIONS

Python for Data Science NPTEL, IIT Madras	Elite Certificate
Completed a 12-week certification with an Elite grade (73%), covering Python programming, data handling, NumPy, Pandas, and data visualization.	
MERN Stack – End-to-End Project Lifecycle Zero Pixels Technologies	July 2026
Completed comprehensive certification covering full-stack web application development across React, Node.js, Express.js, MongoDB, JavaScript, and Git-based development lifecycles.	
B2 English Proficiency Cambridge Linguaskill	Score: 175
Achieved CEFR B2 level certification in English language proficiency, assessed across reading, writing, listening, and speaking.	

LEADERSHIP & ACTIVITIES

Program Representative (UG) – CSE (AI), College Union	2025 – 2026
Represented the CSE(AI) program in the MITS College Union; received a Certificate of Appreciation from the Principal for leadership and institutional contributions.	
Class Representative (S3 & S4)	2025 – 2026
Served as the liaison between students and faculty, coordinating academic communication and class-level concerns.	
Organizer – “Synergia” Hackathon	2026
Co-organized a class-level AI hackathon; managed participant registration, team coordination, judging logistics, and end-to-end event flow, fostering hands-on problem solving among peers.	
Industrial Visit Coordinator – MITS, Kochi	2025
Co-coordinated a 3-day college industrial visit, managing student logistics, scheduling, and on-ground coordination to ensure smooth execution of the entire program.	

TECHNICAL SKILLS

Languages: Rust, Kotlin, Java, C#, Python, JavaScript, TypeScript, C, SQL, HTML/CSS
Frameworks & Libraries: Next.js, React, Node.js, Express.js, Jetpack Compose, Flask, Fastify, Tailwind CSS, MediaPipe, Three.js
Databases: Neo4j, MongoDB, H2 (embedded), SQLite, PostgreSQL
Developer Tools & Protocols: Git, GitHub, VS Code, Docker, Wi-Fi Direct, BLE, Vercel, Cloudflare R2, Linux, Windows
Core Areas: Artificial Intelligence, Full-Stack Web Development, Data Analytics, System Design, Prompt Engineering
